Supplementary Figure 2. LDLR knockout activities of Cas9 and Cas12a nucleases.
(**A**) Activities of SpCas9, SpCas9-HF1, AsCas12a, and LbCas12a when targeted to several sites in exons 1 and 3 of the LDLR gene in K562 cells. Percent modification assessed by T7E1 assay. (**B**) Surface expression of LDLR on K562 cells measured by flow cytometry. Bars indicate mean ± SEM of n = 3.
