

Supplemental Figure 2. Gating strategy to identify 123 peripheral immune cell subsets

Supplemental Figure 2: Gating strategy to identify 123 peripheral immune cell subsets using four immune flow cytometry panels. Classic immune cell types included CD4+ T cells, CD8+ T cells, T regulatory (Treg) T cells, B cells, natural killer (NK) and NK-T cells, conventional dendritic cells (cDCs), plasmacytoid DCs (pDCs) and myeloid derived suppressor cells (MDSCs).
