Supplementary Figure 1: Comparison of histopathology tumor-infiltrating monocytes (Monocyte score) by H&E (n=40) correlated with z-score normalized mononuclear cell gene-expression scores (T cells and T-regulatory cells (CD8A, CD8B, FOXP3), NK cell markers (CD160, CD244), macrophages (CD68), B cells (CD19, CD79B and MS4A1)). Correlation calculated by Pearson’s correlation coefficient (R).
