

Supplementary figure 3: ECAR measurement on Raji cells after MCT-1 inhibition. (A) Representative plot of extracellular acidification rate (ECAR) on Raji cells cultured for 24 hours with MCT-1 inhibitors, n=5 replicates. Bars are the mean \pm SEM. **(B)** Glycolytic capacity, glycolytic reserve and glycolysis. Data from three independent experiments. Bars are the mean \pm SD. **p < 0.01, ***p < 0.001, ns = non-significant by Friedman One-Way ANOVA.
