

# Supplemental Figure 1:

**A**

**Supplemental Figure 1:** Homeostatic cytokines IL-7 and IL-15 are detectable in circulation but not significantly different between CTX and TBI preconditioned mice. (A) Observed concentration in pg/mL of IL-7 and IL-15 in serum collected from mice on Days 7, 12, and 16 Post-ACT. Statistics calculated via Mann-Whitney test (ns denotes not significant).
