

Supplementary Figure S3. Effect of CCL19 and IFN- γ on proliferation and CCR7 expression of CT26 cells. (a) An effect of CCL19 on cell growth of CT26 was examined by WST-8 assay. CT26 cells were cultured with the indicated doses of recombinant CCL19 48 hr. (b) An Effect of IFN- γ on the expression of CCR7 on CT26 cells were examined. CT26 cells were cultured with 50 ng/ml. IFN- γ for 24 hr. Thereafter, the expression of CCR7 was examined by flow cytometry.
