

Supplementary Figure S4. Protective immunity of cured mice against rechallenged CT26 cells. Two months after the first injection of CT26 cells, cured mice were inoculated s.c with 2×10^5 CT26 cells. Naïve BALB/c mice were also inoculated s.c. with 2×10^5 CT26 cells. The values and error bars represent the tumor size of mean \pm s.e.m..
