

Supplementary File 5: Figure S3. IL-1 β , IL-8 and IL-12 cytokine content in BrC SLN cell samples at day 2 of culture

IL-1 β , IL-8 and IL-12 cytokine levels (pg/ml) in supernatants of medium, CpG and CpG+STAT3i conditioned BrC SLN cell suspensions. Dots represent cumulative inflammatory cytokine levels measured in individual BrC SLN cell samples after 2 days of culture (n=11) and means are shown.
