Supplemental Figure S. Imaging mass cytometry quantitative findings 51 clusters.
Boxplots showing quantitative comparisons of all 51 identified different cell clusters present in the whole tumor. In A) the immune cell clusters and in B) the other cell clusters. The three distinct OPSCC subgroups are indicated by different dot colors: HPV red (n=5), HPV16'IR' blue (n=4) and HPV16'IR' green (n=11). Boxplots with bars in box representing the median and interquartile range.
