

## Supplementary Figure 1: Samples available for biomarker analyses passing quality control

*PD-L1: programmed death ligand 1, RNA:  
ribonucleic acid*

Supplementary Figure 3:  
Correlation of PD-L1 methylation  
with PDL-1 gene expression  
(cg19724470)

Green circle represents baseline  
sample, red circle represents cycle  
2 day 8 sample. Yellow line joins  
samples from same patient.

*FPKM: Fragments Per Kilobase of  
transcript per Million mapped reads,  
PD-L1: programmed death ligand 1*
