

Supplemental Table 1 Details of previous ILD in enrolled patients

Radiological sign^a	N (%)	Possible etiology	N (%)
Reticular shadow	24 (68.6)	Idiopathic	21 (60.0)
Ground-glass opacities	12 (34.3)	Infection-associated inflammation induced	6 (17.1)
Honeycombing change	5 (14.3)	Non-infectious inflammation induced	5 (14.3)
interstitial fibrosis	3 (8.6)	Radiation-induced	2 (5.7)
Bronchial vascular bundle thickened	2 (5.7)	Drug-induced	1 (2.9)
Bronchial traction	1 (2.9)	Unidentified	1 (2.9)
Micronodules	1 (2.9)		

^a Percentages could sum to >100% because categories are not mutually exclusive. ILD, interstitial lung disease.
