

Supplemental Figure 9: Kinetic analysis of FR-B 2/15 CD8+ TALs post infusion to monitor persistence of stem-like phenotype: Representative FACS plots showing the frequency of CD39⁺/CD69⁺ (Upper) and TCF-1⁺ (Lower) FR-B 2/15 CD8+ TALs at Days 5, 12, and 19 post infusion. Frequency of CD39⁻CD69⁻ stem-like cells shown in red. Gating for analyzed markers is based on FMO staining at each time point.
